PRECAUTIONS

(1) Important safety precautions:

The following safety instructions ensure that the unit maintains a long service life and prevents fire or electric shock.

- Please read them carefully and be aware of all the warnings below.
- Do not install in a place with poor ventilation.
- Do not install in hot and humid places.
- Do not block the ventilation holes (intake or exhaust).
- Do not install in dusty places..
- Do not install near high temperature or smoke sensors, as this may cause malfunction of sensors.
- Do not install in a place where the air conditioning is directly blown by the cold air, otherwise it may be condensed by water vapor.

Or the temperature rises and the body malfunctions.

(2) Installation:

- For the best effect, use the unit in a dark room.
- Use the unit with care. Dropping or bumping may damage the components inside the unit.

(3) Power supply:

- Use the power cord carefully to avoid excessive bending and damage to the power cord otherwise it will result in electric shock or fire.
- After using the unit, unplug the power cord from the power outlet.

(4) Cleaning:

- Unplug the power cord from the unit and periodically clean the cabinet with a damp cloth. If it is dusty, use a neutral detergent. Never use strong detergents or solvents such as alcohol or thinner.

-
-
- The lens should be cleaned with an air brush or lens paper, and take the lens with care not to scratch it.
 - Clean the vents and speakers on the unit regularly with a vacuum cleaner. If the vents are clogged with dust, the machine may be overheated and cause a malfunction. When using the vacuum cleaner, use a soft brush.
 - Do not use hard accessories such as metal tools to clean the gap.

(5) Notes on fire and electric shock:

- Make sure that the air vents are not blocked so that it can prevent hot air from accumulating in the unit and prevent objects such as paper clips or paper dust from falling into the unit. Do not attempt to retrieve objects falling into the unit. Never insert any metal objects, such as wire or screwdriver into the unit. In the unlikely event that any item falls into the projector, please turn off the projector and consult with seller.
- Do not place any liquid on top of the unit.

(6) Moving the projector:

- When moving the projector, please use soft packaging material to cover it. Do not vibrate the projector violently.

(7) High temperature attention:

- Before projection and after projection, the vicinity of the exhaust port will become hot. Do not touch it with your hands to avoid burns.

(8) Installed in a location away from the wall:

- To maintain the performance and reliability of the projector, leave at least 30 CM between the projector and the wall.

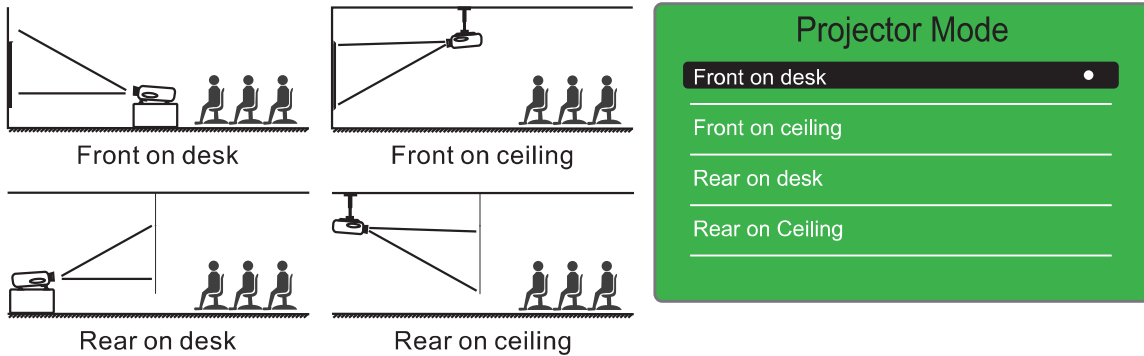

INSTALLATION AND PROJECTION MODE

Projection Mode

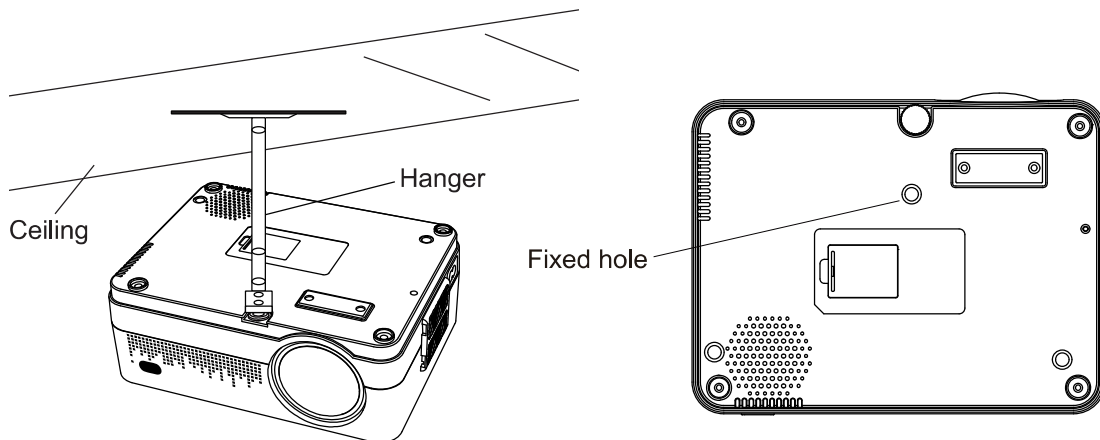

This projector can be installed in four ways :

MIRACAST, AIRPLAY, DLNA FUNCTION

The Eshare App is pre-installed in the projector for a better experience with Android Phone, iOS Apple phone, Pad.

1.To set the phone or pad in the same network as projector.

-  1.Connect your device to"NETWORK-01"
2.Visit "http://10.0.0.11" with web browser or scan the QR-code to download app.  **Setting**
3.Launch EShare and click "EShare-*****" to connect.

2.To Download the Eshare App by scanning the QR code on the projection screen.

3.When being open, the Eshare on the Android devices will search the projector automatically. To choose the same name shown on the projection screen, and to connect it.

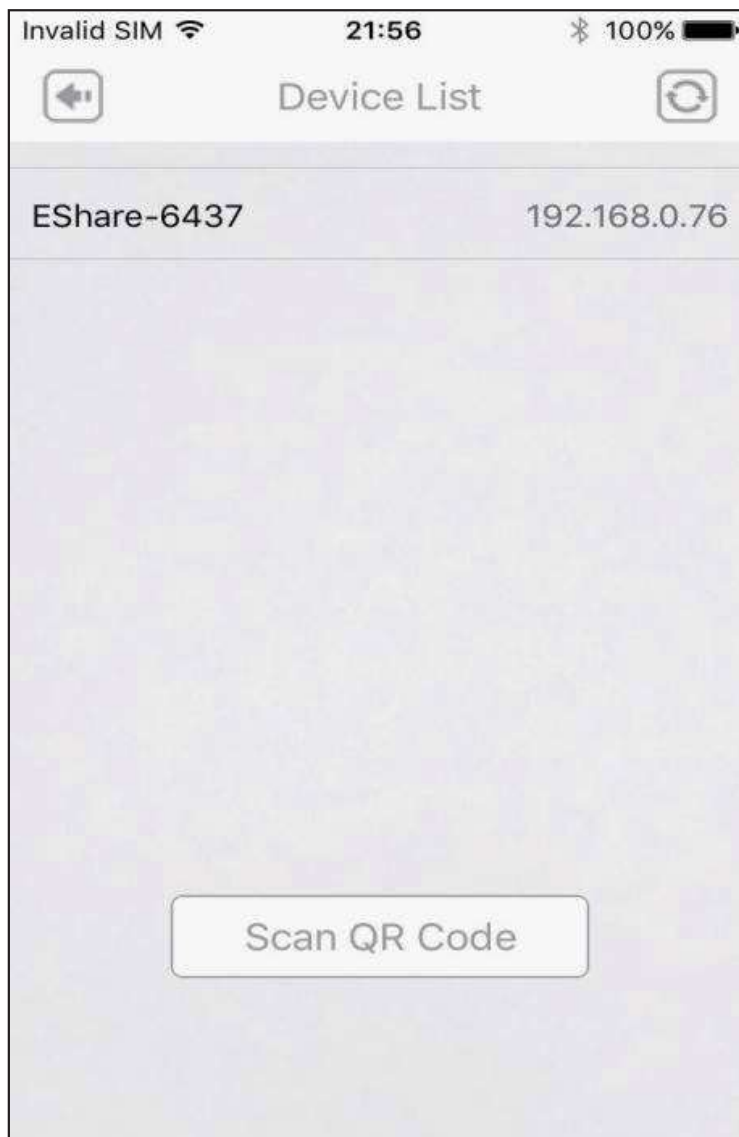

4. iOS devices also need to download Eshare App by scanning the QR code, or download from website.

Note: Eshare App has more functions, such as Mirroring, TV mirroring, and remote control. Please go to Eshare App for more instructions.

Connect to Large Display

Please ensure that your iOS device and projector are in the same WiFi , open EShare on the phone, it will automatically search projector in the same WiFi. and then click the device name you want to connect. Or you can click “Scan QR” to scan the QR-Code to connect to the projector.

KEYSTONE CORRECTION (4D DIGITAL)

More than horizontal and vertical keystone correction, this projector supports four points trapezoidal adjustment.

Keystone correction

Setting Path: Settings→System→Keystone Correction→Manual Correction

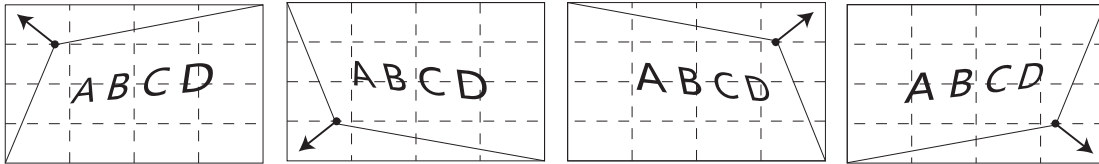

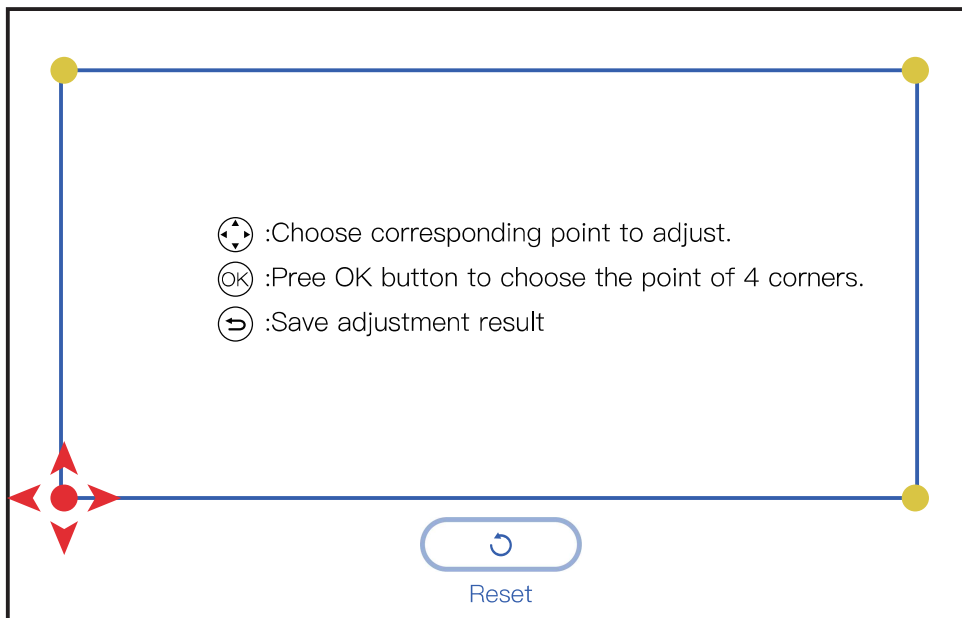

Figure 1

 :Choose corresponding point to adjust.

 :Press OK button to choose the point of 4 corners.

 :Save adjustment result.

 :Reset

-
- 1.To click the “OK” button to choose the image corner to adjust, then to click up down left,right , to stretch or compress the image, to make it a regular rectangle image.
 - 2.To click the “OK” button to choose another image corner, and so on to repeat same operations.

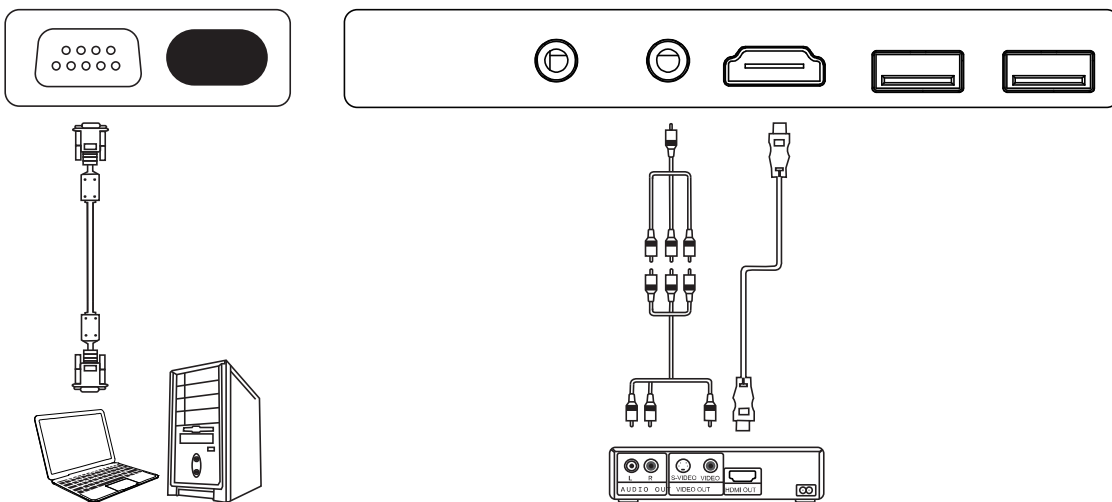

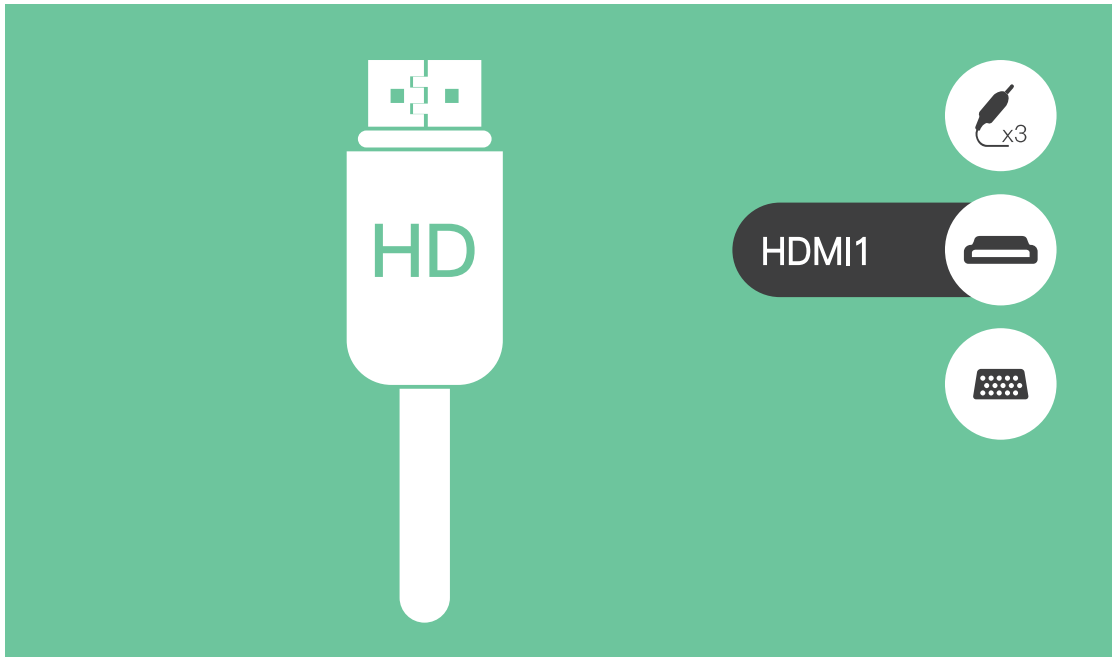

Note: 1. Four points trapezoidal adjustment is an advanced function.

2. If the keystone degree is more than 30 degrees, there may be some image blur. Please be noted, trying to set the projector near the center of the screen, as less degrees helps to project clearer image.

SELECT SOURCE

When the external device is connected to the projector.

1. click the source button of the remote control or projector's top panel to choose corresponding signal source:
HDMI,USB, A/V, VGA.
